

Data Cards

For The JV-80/JV-880/JV-1000/JD-990

The PN-JV80 Series Data Cards provide hot synth sounds that are ideal for professional live performance, sequencing and recording, getting most out of the potential of the JV-80/880/1000 and JD-990. These sound parameter cards work in conjunction with the installed SR-JV80-1/2 Expansion Board, or the JV-80/880/1000/JD-990's internal waveforms. Each card contains 64 Patches, 16 Performances and one Rhythm Set.

● Rich Sound Collection 1

(PN-JV80-01)

*Used with the SR-JV80-01

Using the expansion board Tones, the PN-JV80-01 provides fat, full-bodied synth textures, delicate and realistic acoustic instrument sounds and much more.

● Multitimbral Sounds 1

(PN-JV80-02)

*Used with the SR-JV80-01

The sounds on this card are mapped to the General MIDI Standard, to take advantage of the JV-80/JV-880/JV-1000/ JD-990's polyphony in multitimbral mode.

NEW

Rich Sound Collection 4

(PN-JV80-07)

A collection of superb quality synth sounds assorted from the JV-1000 Music Workstation's built-in Patches. This card is designed for JV-80/JV-880/JD-990 users to share the exciting synth Patches that have been created exclusively for the JV-1000. (* JV-1000 users do not require this card, as the PN-JV80-07's Patches are already included.)

Note:

* These cards can also be used on the JD-990, however, some Patches and Performances may sound slightly different from the original sound. This happens because the waveforms included in these Patches and Performances require "reverse playback", while the JD-990 performs "forward playback" only. In this leaflet, a "★" is affixed to sounds using "reverse playback".
